ANNUAL REPORT OF THE PUBLIC PRINTER.

OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., December 7, 1914.

To the Senate and House of Representatives:

The report of the transactions of the Government Printing Office for the fiscal year ended June 30, 1914, is complete and contains all of the statistical information required by law and such other statements deemed necessary to properly summarize the operations of the office for the period covered.

The total appropriations for salaries, maintenance, and operation of the Government Printing Office, including deficiency appropriations, were \$5,935,570.35. Of this amount the sum of \$322,275 was appropriated for the operation and maintenance of the office of the superintendent of documents and \$120,000 for the extension of the heating and lighting plant, leaving the sum of \$5,493,295.35 available for the production of public printing and binding for the several allottees.

The charges for repay work (which consists of work performed for the executive departments and other branches of the service chargeable to appropriations other than those for public printing and binding) amounted to \$1,011,422.99 during the fiscal year.

The total disbursements and outstanding obligations amounted to \$6,872,629.72, leaving an unexpended balance of \$82,645.93 to the credit of the several appropriations. In addition to this amount there were due from the various departments uncollected repay charges amounting to \$73,300.44. These represent repay accounts and deposits by disbursing officers and individuals not transferred to the credit of the appropriation for public printing and binding on June 30, 1914.

The unexpended balance of \$82,645.93 was composed of the following items: Statutory salaries, office of the Public Printer, \$6,809.20; leaves of absence, \$1,598.65; pay for holidays, \$78.23; salaries, office of superintendent of documents, \$1,210.68; general expenses, office of superintendent of documents, \$19,079.90; distribution of public documents, \$2,652.69; power plant, \$3.88; printing and binding, \$51,212.70.

The total expenditures for maintenance, operation, and general expenses of the Government Printing Office, not including the expenditures for the office of the superintendent of documents, were \$6,453,301.87.

WORK OF THE FISCAL YEARS 1912, 1913, AND 1914.

The following statement is a summary of the production for the fiscal years 1912, 1913, and 1914, and covers the larger items which enter into public printing and binding:

1 Includes work of gathering-stitching-covering machine.

With a few minor exceptions, the work of the past fiscal year shows an increase in the larger items of production. Considerable more work is being handled by a less number of employees actually working, indicating a decided increase in efficiency and earnest cooperation on the part of employees.

SUMMARY OF EXPENSE AND PRODUCTION.

The summary of expense and production covering the fiscal year (facing this page) shows in detail the various items which go to make up the operating expense of each productive division, the value of the product, the overhead charge, and its distribution.

The overhead charge for the entire office shows a decrease over previous year of $6\frac{1}{2}$ per cent, or \$88,206.88.

The total operation cost decreased over previous year by \$29,266.26, while the product of the office (including miscellaneous work for superintendent of documents and stock) increased over previous year by \$209,703.01.

Analysis of operating expense and production by divisions of the office shows each and every one, without exception, was operated without a loss. This is the first time since the establishing of adequate cost records that this condition has been shown. Improved methods of handling certain classes of work, together with close supervision, were mainly responsible for this condition.

The production of postal cards increased over previous year by 29 per cent, or 255,364,960 cards. The Post Office Department is now making direct purchases of stock for this work and furnishing it to this office.

Job work has increased materially. Over 30,000 jackets were handled in the job division as compared with 28,000 last year.

Embossed presswork decreased 75 per cent; this was due to certain restrictions placed upon this class of work by the Joint Committee on Printing.

With practically the same number of employees actually working, the binding divisions increased their product by 5 per cent.

PURCHASES OF NEW MACHINERY.

The most important purchases of new machinery during the year were as follows:

Hydraulic baling press, complete.....	\$1,890
Seybold round-corner cutting machine.....	200
Pasted waste-paper machine.....	1,550
2 Mergenthaler typesetting machines.....	7,787
2 sheet feeders.....	4,218
Kast inseting and wire-stitching machine.....	6,160
Johnson folding machine.....	2,090
Total.....	23,895

IMPROVEMENTS IN BUILDINGS AND PLANT.

Cooper-Hewitt lights throughout the building are being gradually replaced with tungsten lights, the latter having proven to be better adapted to general work. Total cost of all changes made in lighting system was \$3,720.68.

New storage racks in plate vault were installed at cost of \$944.43. New crematory was installed at cost of \$950.16. An additional 12-inch sewer connection was installed, at cost of \$1,539.35, to eliminate danger of the flooding of cellar used for storing large quantities of stock. A new 20-ton scale was installed in stores division at a cost of \$759.06. Improvements were made in ventilating system, at a cost of \$609.08. Painting, inside and outside, cost \$2,248.69. Numerous other changes of a minor nature were made, all with the view of adding to the comfort of employees and the efficiency of the service.

MISCELLANEOUS.

Lumber sent to this office in the shape of boxes and crates, and formerly sold at a nominal figure, is now assorted and reclaimed for use in making new shipping boxes, over 23,000 of which were made for shipment of postal cards alone. It is estimated the reclaiming of this lumber resulted in a saving of at least \$14,000 during the year.

A total of 2,375 medical and surgical cases were treated in the emergency room. A "rest room" has been installed on the fifth floor of the new building for women employees who may become exhausted during working hours. This room is under the supervision of the medical and sanitary officer. I consider it a very humane and necessary adjunct to the office.

The insanitary roller towel has been discarded, and each employee now receives daily an individual towel. All this laundering is done on the premises.

POWER PLANT.

The production of the power plant was 3,403,025 kilowatt hours, an increase over previous year of approximately 100,000 kilowatt hours; the cost was reduced to 1.18 cents per kilowatt hour, as against 1.22 cents last year. Enlargement of the power plant, in order to furnish heat, light, and power to the new city post office building, as authorized and appropriated for last year, has been practically

completed, and the service began on July 1, 1914. This cost will be a proper charge against the post office on the basis of cost per unit of heat, light, and power, and an appropriation for that purpose will be necessary. It is requested that such appropriation be made to the post office, for the reason that if the Government Printing Office appropriation is increased by that amount and for that purpose, and I am directed to supply all necessary heat, light, and power, it is possible more extravagant use may develop than if the post office was to pay for the service as per itemized bills rendered monthly.

PUBLIC DOCUMENTS.

The work under supervision of the superintendent of documents is increasing rapidly. The curtailment of free distribution by some departments and the placing of the publications on a sales basis have been important factors in the increase of this work. The general public is becoming acquainted with the fact that Government publications are available to them at cost, and by the charging of a nominal price these publications are placed in the hands of those who are actually interested; this plan is better than one based principally on free distribution. Two hundred and twenty-nine thousand three hundred and fifty-six letters inquiring for information or containing remittances were received during the year, as against 174,092 in previous year, an increase of 32 per cent. Over 39,000,000 publications were distributed, being an increase of 16 per cent over previous year.

RECOMMENDATIONS.

A close study of the needs of the office leads me to present the following recommendations:

One of the most important problems to be dealt with is that of equipment for the productive divisions. The life of ordinary machinery is, at the most, 20 years; that is, after that time the cost of repairs plus the disadvantages of working with obsolete machinery makes it advisable to discard the old machines and install new ones. The cost of machinery now in the office is approximately \$2,400,000; considerable of it has been in use 20 years, and in some cases even 30 years. A large amount of it is obsolete and should be immediately replaced by more modern equipment. The demands for work from this office are simply enormous and on a constant increase, and more and improved equipment is imperatively needed. Some of the principal items needed are new monotype keyboards with 90-em scale and equipment for combinations of roman and black letter; new linotype machines to replace some that have been running about 16 hours daily for eight or nine years and which are no longer up to date; new presses to take places of some that have been in use 25 to 30

years and are obsolete; a new press to handle the Congressional Record in a more satisfactory manner, and also one "offset" press, such a press being peculiarly adapted to some work; also additional machinery for the bindery. The increasing demand for electrotype and stereotype work will require additional machines; those most urgently needed for this purpose are a wax stripping, refining, and casting apparatus with automatic temperature control, an electrically heated metal pot for electrotype work, and an additional patent wet blackleading machine.

This question of equipment has been thoroughly investigated by the various foremen in direct charge of the work, and they unanimously concur in my opinion that in order to produce the work in a manner satisfactory to Congress and to the executive departments new equipment is badly needed.

In view of the technical nature of most of the work handled in this office and the knowledge and skill required on the part of the employees, I recommend authority be given me to increase the pay of printers and bookbinders from 50 cents to 55 cents per hour and bookbinder machine operators from 55 cents to 60 cents per hour. This would involve an increase of about \$83,000 per year.

To serve the purposes of economy and safety, the four old boilers (two of which are 16 years old and two are 17 years old) now in use in the boiler house should be at once replaced by new ones. The present condition of two kinds of boilers requires the use of both bituminous and anthracite coal, at an increased expense. It is recommended that \$110,000 be appropriated for the purchase of new boilers and other necessary equipment in boiler house, including a modern mechanical coal and ash handling system. If the plant is modernized by the purchase above suggested, it is estimated \$15,000 can be saved yearly. This is an urgent matter and should receive consideration.

Attention is again invited to the need of a new building to replace old one located at H and North Capitol Streets. That building is used for storage, postal-card production, and mailing forces of superintendent of documents, and a large number of employees are engaged therein. The building has been condemned a number of times, is in need of constant and expensive repairs, and by reason of its almost entirely wooden interior construction would offer but little resistance to fire, and in such event would be a serious menace to new building on account of its close proximity. Walls are not strong enough to stand the strain of heavy machinery, and it is thus impossible to extend productive divisions into that building, no matter how badly room is needed. For these reasons, and also the fact that increase in work will in a few years make space in present new building entirely and absolutely inadequate, I suggest that the

question of providing a new building, at an estimated cost of \$2,000,000, should be seriously considered by Congress.

In conclusion, I wish to state that I consider the record made by the Government Printing Office during the year to be a splendid one, and that too much credit can not be given to the officers and employees for their faithful and efficient cooperation.

Respectfully submitted.

CORNELIUS FORD,
Public Printer.

REPORT OF THE MEDICAL AND SANITARY OFFICER.

AUGUST 21, 1914.

SIR: Herewith is a statement showing the number of cases, both medical and surgical, arising during working hours, which were treated in the Government Printing Office emergency room during the fiscal year ended June 30, 1914. There is also included a list of employees who have received compensation for injuries during the fiscal year closed, under the provisions of the act of May 30, 1908, providing for compensation to artisans and laborers injured in the service of the United States:

A total of 2,375 medical and surgical cases were treated during the year, besides 904 redressings of wounds in cases where the employee remained at work after being injured and did not apply for compensation, resulting, additional to other activities, in a grand total of 3,360 cases. One thousand and seventy-eight cases were surgical and 1,297 medical, as shown in the tables accompanying this report. During the preceding fiscal year there were 1,078 surgical and 1,470 medical cases. There were two deaths during the year past, one being due to cerebral embolus (blood clot on brain), and the other occurred as the result of apoplexy.

The respective columns show the number that it was possible to relieve and the number obliged to go to their homes after temporary relief was rendered.

Approximately \$4,603.29 was expended as compensation for injuries received during the fiscal year, as compared with \$4,842.89 for the preceding fiscal year.

The rest room established for the benefit of the female employees suffering from industrial fatigue has been greatly appreciated by them and fills a long-felt want. While the room is small, made necessarily so from the cramped condition of the building, it in point of equipment and neatness stands in the front rank when compared with similar rooms established over the country, and which I have made a point to visit from time to time.

In the near future I trust that the Public Printer will be enabled to assign, with the sanction of Congress, a staff of three trained visiting nurses attached to the emergency room in order that the Public Printer may help, upon their application, those of his employees who are ill, and by suggestions and scientific aid rendered in their respective homes perform a service which would tend, in addition to the humanitarian aspect, to an earlier resumption of duties by the employee.

Respectfully submitted.

WM. J. MANNING, M. D.,
Medical Officer.

Hon. CORNELIUS FORD, *Public Printer.*

TWENTIETH ANNUAL REPORT OF
THE SUPERINTENDENT OF DOCUMENTS
FOR THE FISCAL YEAR ENDED
JUNE 30, 1914.

TWENTIETH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1914.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
October 1, 1914.

SIR: In accordance with the provisions of section 61 of the general printing act, approved January 12, 1895, I have the honor to submit the Twentieth Annual Report of the Superintendent of Documents, being for the fiscal year ended June 30, 1914.

The past year has shown the most rapid growth in all branches of work since the organization of the office. There is no reason to doubt that the work will continue to grow as the people become better acquainted with the fact that Government investigations along all lines are printed and made available at a nominal cost. The curtailing of the free distribution by a number of the departments and the placing of the publications on a sales basis by this office have been large factors in the increase in the work. It is evident that the departments are beginning to realize that the best results are not obtained through the free distribution of their publications, and that the charging of a nominal sum serves to place copies in the hands of those who are actually interested in their contents.

The best evidence that this office is becoming better known and increasing in popularity, and that it is fulfilling the functions of a general information bureau, is shown by the increase in the number of letters received for the purchase of publications, and asking for information, as per the following statement:

	Letters.	Amount.
1911-12:		
Letters containing remittances.....	84,192	\$115,630.43
Letters of inquiry.....	67,749	
Total.....	151,941	
1912-13:		
Letters containing remittances.....	103,256	116,786.42
Letters of inquiry.....	70,836	
Total.....	174,092	
1913-14:		
Letters containing remittances.....	141,932	140,735.57
Letters of inquiry.....	87,424	
Total.....	229,356	

The above statement shows that there has been an increase of 51 per cent of letters received in 1914 over 1912, and about 22 per cent increase in cash receipts.

DISTRIBUTION OF DEPARTMENTAL PUBLICATIONS.

This office distributed for the departments, during 1914, 39,136,659 publications, which is an increase of about 16 per cent over the previous year.

The work of wrapping, addressing, and mailing departmental publications continues to show a decided increase, notwithstanding the fact that a number of the departments have curtailed the gratuitous distribution. This increase is due, in a large degree, to certain changes made by some of the departments in the method of issuing their publications and also to the increase in the membership of the House of Representatives.

There have been considerable opposition to and criticism of the plan of centralizing the distribution in the Office of the Superintendent of Documents, and, while I acknowledge that some of the features of the existing law might be changed so as to improve the system, I am decidedly of the opinion that it would not be to the best interests of the Government to return to the old method of each department distributing its own publications.

It is certain that no other place than this office could be logically or consistently considered a better location. Besides the great saving of work in handling all the books in one place, the installation of the tube system connecting this office with the post office will certainly secure a dispatch of the mails which could not be obtained if the work were done at the various departments.

I am willing to admit that the departments might very well retain a small supply of their current publications to take care of special orders to which they want to give direct attention, but with this exception the work can be better handled from a central distributing agency, especially one which is so closely located to where the publications are printed and to where they are mailed.

The scheme of centralization is a new one, and should not be condemned nor abolished before being given a fair trial; for I earnestly believe that with the cooperation of the various publishing offices such a central agency will prove to be the best method of handling the distribution of Government publications.

Since the distribution of documents has been turned over to this office it has been found that in previous years some of the departments in a number of cases have ordered a supply of their publications far in excess of possible demand, which has resulted in valuable additional storage space being required for publications that in the end are condemned and sold as waste paper.

In cases where we have found that there was an excessive order made it has been brought to the attention of the departments, and in nearly every instance they have gladly accepted our suggestion and reduced the number to be printed. This is not mentioned as a criticism of the departments, but to show how a central agency may be used to effect economies.

LIBRARIES.

Considerable attention has been given to assisting the libraries, and it is noted that there is a very noticeable increase in the library demand for publications, which shows that our effort to popularize Government publications is bringing about good results.

There are on record the names of over 10,000 libraries which have signified their interest in public documents, and when it is considered that less than 500 of these are regular Government depositories, it can be readily seen that there remains a very large field to be supplied. The fact that we do not receive any regular supply of many of the current publications for distribution to miscellaneous libraries makes it necessary for us to refer the larger number of library requests to the issuing offices.

We are daily in receipt of requests for a free list showing publications available for distribution, but it has not been found practicable to issue such a list because of the limited number of copies and the great variety of books we have in stock, outside of the consignment stock, amounting to about 2,300,000 copies. In view of this fact, if the libraries interested in completing their sets of special publications would avail themselves of the "library want" blanks in submitting their requests, it would enable us to file in convenient form those requests which could not be filled at the time of their receipt, so that if copies of the desired publications were afterwards received in stock the library wants could then be completed.

AMERICAN LIBRARY ASSOCIATION.

The American Library Association Conference which was held here in May devoted one of its sessions to the public documents question, and it was especially gratifying to note the expressed appreciation by the members of the work done and interest shown by this office for the libraries.

ACCUMULATION OF PUBLICATIONS.

The task of handling the returns of documents from Government departments and the libraries of the country has been the most difficult proposition of any with which we have had to contend. Only those who have handled this work can comprehend what it really means to arrange and assort this tremendous mass of about 500,000 old publications in cramped quarters and with mostly untrained people. Notwithstanding the handicap under which we have labored, however, considerable progress has been made and conditions have greatly improved, and we hope soon for satisfactory relief.

DOCUMENT CATALOGUES AND INDEXES.

The Document Catalogue for the sixty-first Congress, July 1, 1909, to June 30, 1911, was published during the year. The Document Catalogue for the Sixty-second Congress is well under way, and it will be ready for printing in the early part of 1915.

During the year we also printed and distributed Document Indexes for the Sixty-second Congress, third session, and the Sixty-third Congress, first session. The Document Index for the Sixty-third Congress, second session, is being kept up to date, so that it will be ready to be printed shortly after the adjournment of Congress.

The Monthly Catalogue, which lists all publications printed during each month, showing the prices and how obtainable, has never failed to be printed and mailed during the month following its date.

In conclusion, permit me to add that one of the most complicated problems that I have had to solve is to get and retain at the present salaries good and efficient clerks whose work will maintain the high standard that this office should have. The initial salary of \$720 per annum is too low. I do not think, from my recent experience in trying to fill vacancies, that other offices have to encounter so much trouble in such an acute form, for the reason that they can offer better salaries and more favorable inducements for the same grade of work. There ought to be some remedy for these conditions in this office.

Since I have assumed charge of this office I have virtually reorganized it, making a number of changes and inaugurating an improved system, which has resulted in increased efficiency and better dispatch of the work.

In view of the facts as stated, and my intimate acquaintance with the office practically since its inception, I am prompted to prophesy for it a very popular and useful future.

Respectfully submitted.

JOSIAH H. BRINKER,
Superintendent of Documents.

HON. CORNELIUS FORD,
Public Printer.
